

COMICCRAFT – AI COMIC STORY CREATOR

Problem-Solution Fit Canvas & Team Work Allocation

Team ID	SWTID-2026-3533
Project Name	ComicCraft - AI Comic Story Creator using Gemini Models

1. PROBLEM-SOLUTION FIT CANVAS

1. CUSTOMER SEGMENTS [CS] Students, children, teachers, aspiring comic creators, storytellers and social-media content creators who want to turn ideas into comics.	6. CUSTOMER LIMITATIONS [CL] Limited drawing/design skills, limited time, difficulty creating characters and panels manually, and access mainly through mobile or basic devices.
5. AVAILABLE SOLUTIONS – PROS & CONS [AS] Manual comic creation: creative control but time-consuming. Generic AI image tools: fast visuals but may not provide a complete comic workflow or consistent storytelling. ComicCraft: combines AI-assisted story creation and comic generation in one workflow.	2. PROBLEMS / PAINS + FREQUENCY [PR] Users struggle to convert an idea into a structured comic story, create suitable dialogue and scenes, and produce consistent visuals. These difficulties can occur whenever they attempt to create a new comic.
9. PROBLEM ROOT / CAUSE [RC] Comic creation normally requires writing, storyboarding, character design, dialogue, panel planning and visual design skills. Doing all steps manually takes time and practice.	7. BEHAVIOR + ITS INTENSITY [BE] Users may write rough ideas, search for inspiration, use templates or separate AI/design tools, and abandon or simplify projects when creation becomes difficult. The effort is high for beginners.
3. TRIGGERS TO ACT [TR] A new comic idea, school/college project, creative challenge, need for quick content, or desire to share a personalized story can trigger the user to create a comic.	10. YOUR SOLUTION [SL] ComicCraft is an AI-powered comic story creator using Gemini models. It helps users transform a simple idea into a structured comic story with characters, scenes, dialogue and panel-oriented content, reducing the effort required for manual comic creation.

2. TEAM MEMBERS & WORK ALLOCATION

No.	Name	Assigned Work
1	C. Iswarya	Project planning, requirement analysis, customer/problem research, and overall coordination.
2	Hasini.D	UI/UX design, user flow, comic interface layout, and frontend design support.
3	Ramya.A	Story creation module, prompt design, character/dialogue structure, and content testing.
4	Nandhini	Gemini model integration, backend/API workflow, AI response handling, and technical testing.
5	Nivetha.K	Testing, debugging, documentation, presentation preparation, and final project validation.

Project Objective

To develop ComicCraft as an AI-assisted comic story creation system that makes comic development easier for users by helping them move from an idea to structured characters, scenes, dialogue and comic-ready content using Gemini models.

Expected Outcome

A simple and user-friendly comic creation workflow that reduces the time and effort needed to plan and develop a comic, while encouraging creativity and making the process accessible to beginners.

Team ID: SWTID-2026-3533

8. CHANNELS OF BEHAVIOR [CH] ONLINE: web/app interface, social media, educational platforms and online communities. OFFLINE: colleges, schools, workshops, creative clubs and project demonstrations.	4. EMOTIONS BEFORE / AFTER [EM] Before: confused, time-pressured, unsure how to start, frustrated with designing. After: more confident, creative, satisfied and motivated after obtaining a structured comic concept.
---	--

Proposed Solution

Approach	Use Gemini models to understand the user's idea and assist in generating a structured comic story, including characters, scenes, dialogue and panel-wise descriptions.
Key Features	• AI-assisted story generation • Character and scene creation support • Dialogue generation • Panel-wise comic planning • Simple user-friendly interface • Refine and regenerate content

Team Members and Work Allocation

No.	Name	Assigned Work
1	C. Iswarya	Project planning, requirement analysis, problem identification, and overall team coordination.
2	Hasini.D	UI/UX design, user interface layout, user flow, and frontend design support.
3	Ramya.A	Story generation module, prompt design, character/dialogue structure, and content preparation.
4	Nandhini	Gemini model integration, API/backend workflow, AI response handling, and technical testing.
5	Nivetha.K	Testing, debugging, documentation, presentation preparation, and final project validation.

Resource Requirements

Resource Type	Description	Specification / Allocation
Hardware	Computing Resources	Laptop/Desktop; internet connection; suitable RAM for development
Software	Development Framework / Language	Python; suitable web framework
AI Model	Generative AI service	Gemini models / Gemini API
Libraries / Tools	Development and testing	Required Python libraries, API SDKs, UI libraries and testing tools
Development Environment	IDE / Editor	VS Code / PyCharm / Jupyter Notebook
Data	Project inputs	User-provided story ideas, prompts, characters and comic content

Expected Outcome: A simple AI-assisted workflow that helps users convert an idea into a structured comic story with less manual effort, while supporting creativity and easy content refinement.

Project Initialization and Planning Phase

Date	01 October 2026

Project Title	ComicCraft - AI Comic Story Creator using Gemini Models
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) Report

The proposal aims to simplify comic creation using artificial intelligence. ComicCraft uses Gemini models to help users transform a simple story idea into structured comic content such as characters, scenes, dialogue and panel descriptions. The system is designed to reduce the time and creative effort required for manual comic planning.

Project Overview

Objective	Develop an AI-assisted comic story creator that helps users generate and organize comic stories quickly and creatively using Gemini models.
Scope	Covers idea input, AI-assisted story development, character and scene creation, dialogue generation, panel planning, and comic-ready content through a simple workflow.

Problem Statement

Description	Creating a comic manually can be time-consuming and difficult for beginners because it requires story writing, character development, dialogue, scene planning, panel arrangement and visual design skills.
Impact	These difficulties can make users spend more time planning than creating. ComicCraft aims to reduce this effort, improve accessibility for beginners, and help users develop ideas into structured comic content.

Solution Architecture
